Advanced Monitoring Systems

Milestone XProtect® Corporate

Advanced Video Surveillance for 24/7 Mission Critical Operations

XProtect Corporate is IP video management software (VMS) designed for large-scale, high-security installations that demand situation awareness of any event and uninterrupted access to live or recorded video. Providing end-to-end protection of video integrity, while maximizing hardware performance, Xprotect Corporate uses its central management platform, built-in video wall and support for failover recording servers to provide an integrated and flexible video management system.

XProtect® is a video management software that brings all the puzzle pieces of a video surveillance installation together in a perfect combination, so you can create a video solution that keeps people and property safe today – and tomorrow.

Fully configurable

Open-platform architecture and a wide range of APIs enable you to continuously build on your existing platform with additional hardware and software.

User-friendly

Centralized search platform and multi-layer maps assure visualized situational awareness, intuitive camera navigation and easy collaboration.
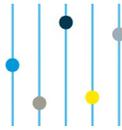

Peace of mind & security

The industry's most reliable recording with failover servers for continuous video access. Built-in safeguards and tier access ensure privacy and cybersecurity.

Advanced Monitoring Systems

Reliable   **Customizable**   **Scalable**   **User-friendly**   **Secure**

XProtect® Corporate Capabilities

- **Central Management**
  Centrally manage multiple sites with XProtect Corporate as a central hub using Milestone Interconnect as a cost-efficient solution for distributed operation.

- **Edge Storage with Failover Servers**
  Support for Edge Storage recordings and Failover Servers for uninterrupted access to video, even during system failures and maintenance downtime.

- **Encryption**
  Dual-end certificate-based encryption between recording servers and all other system components.

- **Fully configurable**
  Open-platform architecture and a wide range of APIs enable you to continuously build on your existing platform with additional hardware and software.

- **User Access Management**
  Close monitoring of user access rights and efficient management of multi-user installations.

- **Security**
  Reinforce your system's resilience to cyber security threats without compromising people's privacy with a GDPR-ready certified VMS and an array of built-in security and privacy tools.

- **Multi-layer maps**
  For quick navigation between buildings and floors and visual overview of installations in every size.

- **Alarm Manager**
  Built-in Alarm Manager for a consolidated overview of security and system alarms, immediate visual verification and efficient investigation.

- **XProtect Smart Wall**
  Built-in video wall solution for immersive visualized situational awareness and efficient response coordination.

- **Video Bookmarking**
  Built-in Alarm Manager for a consolidated overview of security and system alarms, immediate visual verification, and efficient investigation.

- **Centralized Search**
  Search for video, motion, alarms, events, and bookmarks all in one place and save your search templates for quick future investigations.

- **Unlimited system scalability**
  Support for unrestricted number of servers, cameras and users provides efficient central management of systems in all sizes using Milestone's open platform.
